

Get past the ATS and boost interview chances with Jobscan

Jobscan analyzes resumes against job descriptions for match rate, keywords, job title match, and more to give job seekers a boost in the application process.

Jobscan partnerships benefit job seekers and their organizations by saving time, fostering independence and delivering data tracking to ensure real time results.

- Cuts resume-tailoring time by 24%
- Saves career counselor's time by 31%

CONTACT US

partners@jobscan.co

Jobscan is built by the same algorithms used by major Applicant Tracking Systems (ATS) such as Taleo, iCIMS, etc. to help surface job seekers during recruiter and HR keyword and Boolean search.

Employers use robots,
so should you.

KEY FEATURES

- Resume scanning
- Cover letter scanning
- Keyword comparisons
- Match rate calculations
- Usage Reporting
- Resume Manager
- Application History
