

Why Jobscan?

Employers are using cutting-edge technologies and AI to filter resumes. But what tools do you have? Jobscan's machine learning algorithms help job seekers land interviews faster.

Optimize resumes, LinkedIn profiles and cover letters

98% of Fortune 500 companies use applicant tracking systems (ATS) to sort, filter, and rank job applicants. 87% of recruiters use LinkedIn to source and vet candidates.

Highly qualified candidates slip through the cracks of these automated processes.

Jobscan's optimization technology is based on the same search and ranking algorithms used by top ATS and LinkedIn Search, as well as recruiter surveys. Jobscan helps you reach the top of the recruiter search results.

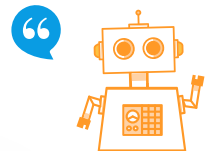

With Jobscan:

Interview rates 30%

LinkedIn profile views 132%

Time-to-interview 46%

See how well you match the job. Receive actionable steps to improve your match rate.

Match rate percentage, ATS checks, recruiter insights, and skills matching

MATCH RATE 56%

SCORE 80%

ATS FINDINGS

- SKILLS AND KEYWORDS: You are missing 1 important high-value skills on your resume. For example, *teaching* appears on the job description, it does not exist on your resume. You are additionally missing 5 hard and soft skills. View your missing skills below.
- JOB TITLE: The job title "Content Writer" from the job description is also found in your resume. We

LINKEDIN BASIC INFO

- FULL NAME: First and last name provided.
